

MyCarrier + Dockware Quickstart Guide

Get up and running with the MyCarrier Dockware Mobile Scanning in minutes!

1. Download the Dockware Mobile App

First, you'll need to install the application on your mobile device.

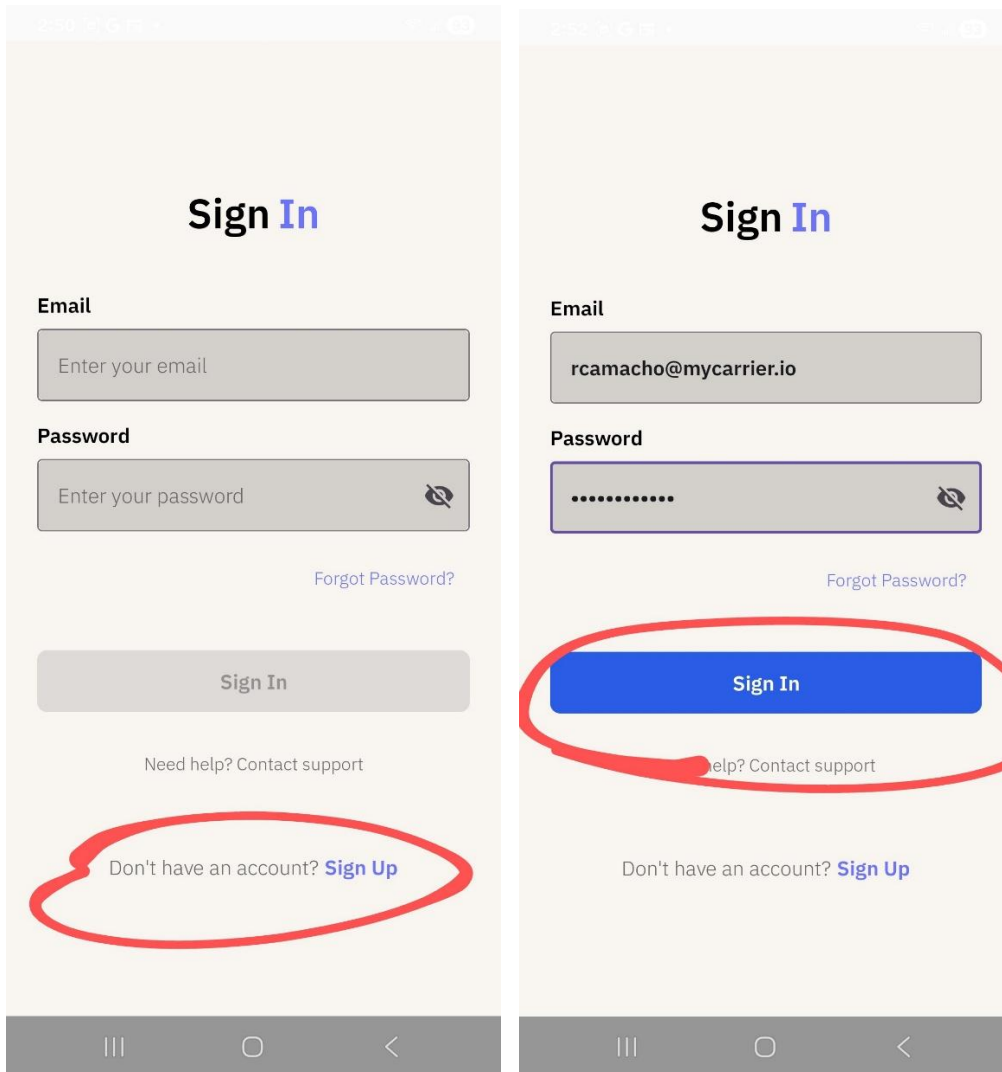

- Open the **Google Play Store**.
- Search for "**Dockware**".
- Tap **Install** to download the app to your device.

2. Create a Dockware Account

Once the app is installed, you need to set up your credentials.

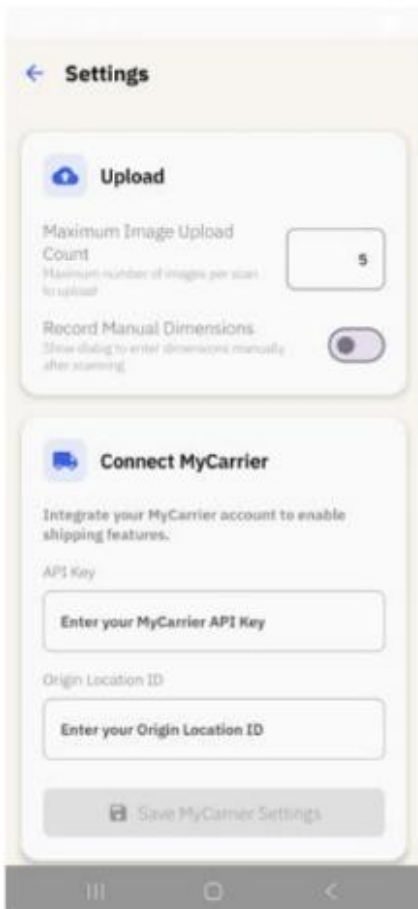

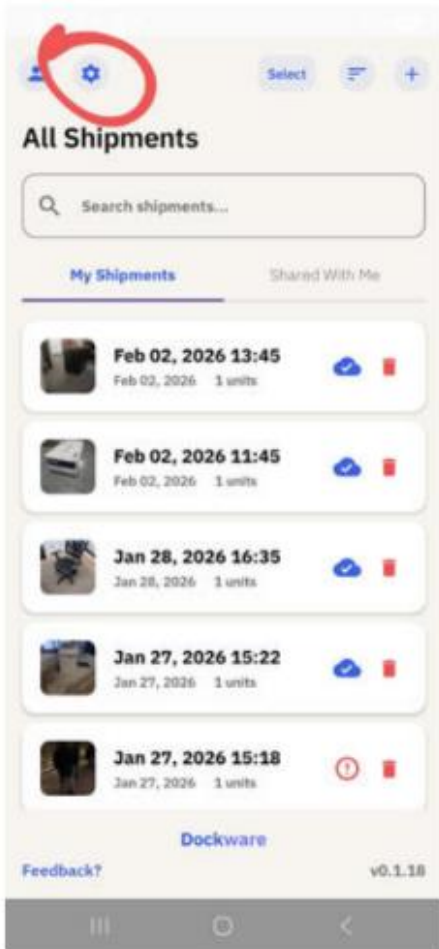

- Open the app and navigate to the **Sign In** screen.
- Tap the **Sign-up button** at the bottom of the screen.
- Follow the prompts to **enter your email** and **create a secure password**.

3. Connect Your MyCarrier Account

From the main "All Shipments" dashboard, tap the **Settings (gear icon)** in the top left corner.

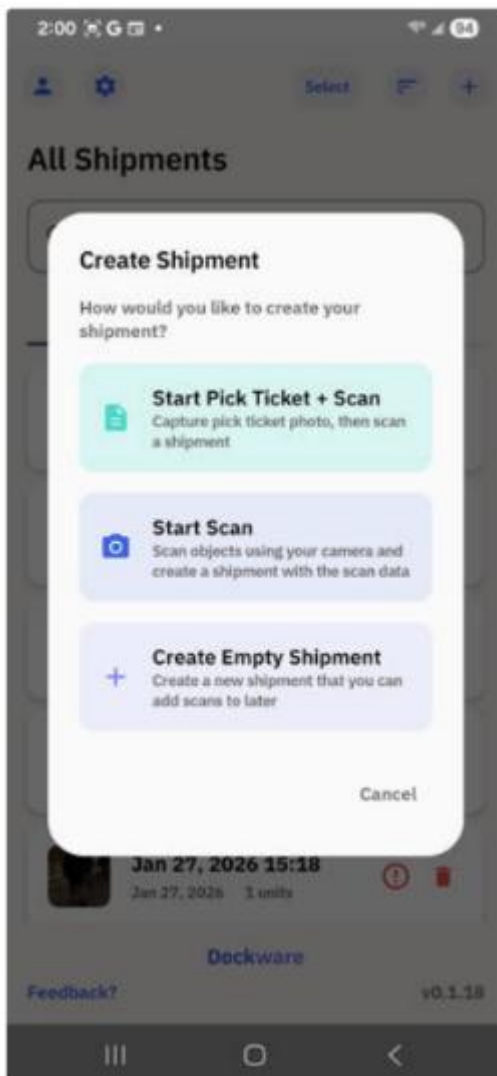

- Scroll down to the Connect MyCarrier section.
- Enter your API Key and Origin Location ID.
- Tap **Save MyCarrier Settings**.

4. Perform Your First Scan

Now you're ready to automate your shipment dimensions!

- Return to the home screen and tap the large "+" (plus) icon to create a new scan.
- This will present you with 3 options. Select either Start Pick Ticket + Scan (if you are using a Pick Ticket as part of your process) or Start Scan (for non-pick ticket users). Create Empty Shipment is not utilized by the MyCarrier Integration and can be ignored for the purpose of this walkthrough.

- Follow the on-screen instructions to scan your handling units as well as capture the dimensions and weight.
- Review the captured data on the "Info look good?" screen.
- Once confirmed, tap Send to MyCarrier to instantly send the order details to MyCarrier
